Project Development Phase
Model Performance Test

Date	25 February 2026
Team ID	LTVIP2026TMIDS81684
Project Name	Calculating Family Expenses using ServiceNow
Maximum Marks	5 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	System Summary	The application is developed using the ServiceNow platform to manage and calculate family expenses efficiently. The system allows users to: • Add daily expense records • View and manage expenses • Automatically calculate total expenses • Generate reports and summaries • Admin manage records and users The system uses ServiceNow Tables, Forms, Business Rules, and Scripts for automation.	2.	System Accuracy	The system was tested by entering multiple expense records with different values. Results: • Data saved correctly without errors • Automatic calculations matched expected totals • Reports displayed correct summaries • No data mismatch observed during testing System Accuracy: 100% functional correctness during testing scenarios.	
3.	Functional Testing	Functional testing was performed to verify that all modules of the system operate as expected. Tested Functionalities: • Creating Daily Expense records • Viewing Family Expense summaries • Automatic number generation for records • Mandatory field validation • Reference field selection • Data retrieval and updates All functionalities worked successfully without system errors.	
4	Automation Validation	Automation testing was conducted to validate the business rule responsible for calculating and updating family expense totals. Testing Results: • When a new Daily Expense record was added, the Family Expenses table updated automatically • Total amount was calculated correctly • Expense details were appended without manual intervention • System automation worked as expected Automation Logic: ServiceNow Business Rule using GlideRecord scripting.
